

ACADEMIC ANALYSIS

Sustainability Crisis in Neural Networks

Prepared by

Poneglyph Intelligence

Research Domain

Environmental & Sustainability Studies

Sources Analyzed

1

Generation Date

June 2026

This is a report text.

Evidence Appendix

This appendix lists the exact supporting excerpts from the source materials supporting the findings cited in the report.

[1]

Operational energy footprints of generative foundations

"Training next-generation foundation models requires gigawatt-hour scale footprints, straining local grids."
